Who Will Be F.F.A. Sweetheart?

The crowning of the F.F.A. sweetheart will be the highlight of this year's FFA Thanksgiving Dance, "Harvest Moon". Candidates for this year are Martha Harvey, Kay Stratton, Cindy Quill, and Grace Ranson.

Music will be provided by Lynchburg's finest band, "The House of Commons". The band frequents such hot spots as Dicky's Place, They have also been the highlight of several of our school dances.

All Appomattox Students, grades 8-12, are invited to join the Appomattox FFA and FHA at the high school gym on Wednesday night, November 22, from 8:00 - 11:30 p.m. for a real swinging evening. Admission will be $1.00 stag, $1.75 drag. Dress for men will be coat and ties. Refreshments will be provided by the Future Homemakers of America and Chaperons will consist of the advisors of both the F.F.A. and F.H.A.

180 members of the Appomattox F.F.A. will be voting on one of these four lovely ladies for this year's F.F.A. Sweetheart. These Future Homemakers and their escorts will be treated to a dinner and presented with flowers and a gift.

The theme of the program is "Harvest Time."

The afternoon program will be Christmas ideas by Mrs. Karen Falls, home economist with Vepco.

The National Park Idea Natures

by Ken Apschnikat, Park Historian

(The third and last in the series of articles on the National Parks Centennial and the National Park System.)

The National Park Service was established by the Congressional Act of 1916 which states ". . . to conserve the scenery and the natural and historic objects and the wildlife therein (of the National Park System) and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations." The purpose and philosophy of the Park Service lies in this statement. As the wording explains the first objective is to conserve them to provide enjoyment to all the people. The closing statement is most important - to leave the parks for future generations to enjoy. This Congressional Act was the most significant piece of legislation the National Park Service had to work with in 1916 when the bureau was established.

Stephen T. Mather was appointed first director of the National Park Service in 1916. This new job encompassed eleven national parks, eighteen national monuments, and two other reservations totaling 4.5 million acres. The infant National Park System was to expand by 1972 to 284 national areas with a total of over 30 million acres. Six directors would succeed Mather evolving to the present director George B. Hartzog, Jr.

During the 1920's the automobile made its lasting impression upon the national parks. With the evolution of the car came the unmistakable evidence of revolutionary change in park use. In 1924, Henry Ford turned out his 10 millionth tin lizzy. At that time only twelve miles of paved roads existed in all national parks. The impact of the automobile was to be felt throughout the years as the Park System grew and auto transportation became the common means of travel.

Major change in the National Park Service occured during the 1930's. President Roosevelt created 64 areas from other government agencies to the Park Service. These new areas included the National Capital Parks, monuments, military parks, battlefield sites, and memorials. The system began to grow by leaps and bounds particularly after the Historic Sites Act of 1935 placed emphasis upon history in the park system. Today, over half the areas in the System are historic in nature. With the establishment of the Civilian Conservation Corps (CCC) under Roosevelt's New Deal, camps were set up in almost every national park. This enabled the parks to catch up on their backlog of greatly needed projects. The CCC's constructed buildings, trails, campgrounds, bridges, utility systems were installed, roads constructed or improved, historic buildings and battlefields restored, and visitor facilities improved.

The Service weathered the war years with some difficulty but sprang back slowly as the travel boom hit the country after 1945. The pattern of increased visitation with no increase in funds for maintenance and staffing was set. It would last even to the present.

With the advent of the 50's a new program designed to meet the overwhelming needs of the nation in the future was established. Mission 66 began in 1956 with a program of planning, developing, staffing, and financing to handle the increased visitation by 1966. For the park system Mission 66 brought rejuvenation. Time worn facilities were rehabilitated or replaced. Over 130 new visitor centers were built, museums and information centers served as the focal point for visitor information and interpretation.

The 1960's brought on new problems for the parks. The concern for the environment became evident. With the appointment of George Hartzog in 1964 came a new look at the parks and how they were to be managed. During the 60's new pieces of legislation put substantial responsibilities upon the Park Service. The push for urban parks placed emphasis upon "bringing parks to the people". The National Park Service became big business. The visitor facilities were provided and people visited the parks, more than 180 million in 1971. The question now stands: "What about the future?" Will the parks be able to provide the overwhelming demand for facilities? Can the parks survive and continue to provide a unique park experience for each and every park visitor with an increase of millions each year? These and other questions will have to be answered before the next decade.

The National Parks are just completing their 100th year of operation. This Centennial Year should bring the people closer to their parks and the parks closer to the people. The National Park Service is looking ahead to the next 100 years. What will be said in the year 2072 about the Second Century of National Parks? You have been a part of the first hundred years. You, your children and your grandchildren will be a part of the second hundred. Let us do our part in making the second century as great as the first.

S C A REPORT

The monthly meeting of the Student Council Association at Appomattox Intermediate School was held on November 9, 1972. The meeting was called to order by the President, Ann Sears. The Secretary-Treasurer reported a balance of $58.30 in the treasury.

Plans are being made for a student- faculty volleyball game.

A poster contest is being planned for the near future which will be on cleaning up our school cafeteria. First prize for each grade will be $5.00. Second, third, and fourth prizes for each grade will be $2.00. The slogan will be decided by the committee which will be headed by Ann Sears.

Teresa Almond was appointed chairman to plan a Christmas Party for the 5th and 6th graders.

A large bulletin board will be placed in the cafeteria to post information concerning the S.C.A. activities.

We feel that the S.C.A. has gotten off to a good start this year, and hope that all students will put forth every effort to make it a great success.

Rindy Lawson,
S.C.A. Reporter

Enjoy your parks, but remember, preservation and conservation go hand-in-hand with enjoyment and use. Let us all leave the parks "unimpaired for the enjoyment of future generations."

Rocks Quartet Releases Second Album

"I Want My Life To Tell" by the Rocks Quartet has recently been released as the second album recorded by the local quartet.

Members of the Rocks Quartet, pictured above from left to right, are James Paulette, Pianist; Thomas Ranson; Aulden Roach; Lloyd Richardson; H. T. Nash, Jr.; and Sammy Dickerson.

Any member of the Rocks Quartet will have copies of their new album for sale. Need a suggestion for a Christmas gift for someone on your list? Why not a record by the Rocks Quartet.

The Quartet would like to thank all the people for the support given them by buying copies of their first recording. They report that over 1000 copies were sold and that copies of both recordings are still available. They would appreciate the opportunity of selling one of their records to you, also.

BECKHAM
